4.00	Clear up and Clear out			

Campaigns Round-Up (UK & international) - Your campaign's chance to plug what you've been up to in the last year & call out for people to get involved!

Intro to *Rising Up* - is a network that started just over a year ago, yet we've seen successes in multiple campaigns – including fossil fuel divestment, fracking, inequality/racism/abusive employment, and air pollution. We're still experimenting. We're expanding. We're preparing for a national uprising. Come and see how we're doing things differently...

Practical Blockading Training – Group training including skillshares on the use of lock-on tubes, tripods, car lock-ons, and more. Lock on for live-in (nappies included); people will practice working in teams, looking after each other emotionally, providing mutual support and working safely. Also covering legal, safety, teamwork issues, etc.

Climbing - Outdoor tree climbing for beginners using harnesses and rope with experienced tree protectors. Learn simple safety techniques for your inner Squirrel.

'Anti-Oppressive Facilitation skills' - A collaborative workshop for experienced facilitators and those interested in learning facilitation skills based in an anti-oppression framework. We will discuss practical skills related to facilitation and brainstorm ideas for creating an anti-oppression statement that can be

Engaging Deeper, Longer - Wanting to challenge yourself to step up your game but have blocks holding you back, Fears, Feelings of inadequacy or maybe you can't see where your future self fits? Join us to discover ways to build resilience, nurture hope, and engage more deeply...

Revolutionary ecology: This workshop will offer some ideas for why effective eco-defence must always be grounded in a coherent revolutionary strategy. Winning individual campaigns is one thing, but to challenge the roots of ecological domination we must think bigger. That means calling the state, capitalism, and hierarchy in general into question.

Anarchism and ecological activism - vision and strategy: -This workshop is aimed at facilitating a discussion on vital aspects of long-term Earth First! strategy. Most of us agree that saving the earth means igniting revolution, yet we far too rarely talk about how our activism is actually supposed to help make this happen.

'Trans-fem 101' - Focusing on the importance of anti-oppression work and inclusion in our organizing and activism this workshop will provide a judgement free space to learn about trans experiences and a chance to ask a trans person your questions. Don't be shy, this workshop is specifically focused on engaging people who have little to no experience with issues affecting trans and/or gender nonconforming people.

used by facilitators and workshop presenters who want to incorporate principles of anti-oppression into how we organize, communicate, and learn with each other.

Hambach Forest - For over six years, a movement of dedicated eco-defenders have been fighting the energy giant RWE. The Hambach forest squatters, with their tree-sits and blockades of forest-wrecking machinery, deploy a broad variety of tactics to bring a halt to the ever-consuming death machine of the coal fueled industry.

Over, Under, Through: Fences And Overcoming Them - When trying to take direct action we are often held back by fences. Come and find out about different types of fences, and how to get past them in a variety of ways. This is not just for people who are confident with heights and climbing! There will be an emphasis on how we can support each other to get a whole group where it needs to be, when possible. There is a practical element to this workshop so wear clothes and footwear that you can move and climb in at a level you feel comfortable with.

'Local wildlife persecution; what can I do?' - a discussion on wider tactics to use against wildlife persecution, other than sabotaging fox hunts. From Sheffield Hunt Sabs.

Barrier fun with STAG-

How to turn up and have a role engaging in legal obstruction of tree felling in an urban environment.

Locksmithing for beginners - Learn how locks work, and how to open them using lockpicking and other bypass techniques. If you have your own padlocks or lockpicking tools, bring them along for practice!

Foil Vendanta grassroots - solidarity group share the mega successes they've had alongside communities in Zambia and Odisha, India defending themselves against Vedanta mines through protest and legal cases. Vedanta is directly responsible for loss of life and destruction of land and resources, with mines, refineries and factories across India, Zambia, Liberia, South Africa, Namibia, Australia and Ireland.

Biowesia Forest Resistance

In Poland, one the very last remnants of natural lowland forests on the European continent, hear about the tactics and commitment to protect the primeval Forest defending it against the exploitative loggers

Code Rood

The direct action group from the Netherlands showing the successful camp that took over a supper mine. They are planning another mass civil disobedience action for this year.

Break-out work shops-

Time for smaller groups to meet and collaborate on where and what next from people and campaigns during the week end- time tabled during the closing go-round.

Saturday Morning Sessions- Sharrow Community Forum Old Junior School South View Road S7 1DB- 5 min walk from ReGather- parking available

**After the Moot -
The Outdoor Skillshare // 26th
February to 1st March // Dipton,
County Durham**

Shut Your Coal Hole warmly invites you to join us in beautiful rural County Durham for a few days of skill sharing and workshops about outdoor life and resistance techniques to protect this area from a new opencast coal mine. From mass catering to foraging wild foods, from land defence to climbing trees and everything between; come and learn new skills, meet new people including locals residents and share your experiences with others.

We'll be joined by experienced activists from the Hambacher forest occupation, international coal campaigners and the successful Coal Action Scotland campaigns.

This skillshare will be a safe, inclusive and participatory environment for learning new, interesting and transferable skills and is open to people of all abilities and experiences. Beds available at the accommodation and inside and outside activities. The skillshare will be a creative melting pot of ideas and techniques to sustain life and resist oppression (however it manifests itself).

Check the website coalaction.org.uk or check out our twitter to receive updates as they happen and feel free to contact us with any suggestions/requirements/questions you may have.

Fracking Shambles @ Hagglers
**Hagglers Corner,
Sheffield**

Saturday eve 24 Feb 2018 at 7pm

An anti-fracking fundraiser to help us print a huge banner for the wall at Hagglers Corner to get more people aware and involved in stopping this toxic industry!

Come and dance, listen, talk, shake, rattle and roll,.. show your support for a frack free planet!

Extra funds will go to court costs of protectors fighting fracking on the front lines in the UK.

We have wood fired pizza from the Sunshine Pizza Oven, live music from The 20ft Squid Blues Band, and more TBC, DJs DisOrientalist, Chiv, Moonmonkey, bringing global beats and funk and more, and some brilliant inspirational speakers coming to share their learnings...

please keep checking in for updates, and share, and invite your friends and even strangers... let's unite to fight fracking!

Venue

Hagglers Corner , Queens Road , Sheffield
